DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group I, claims 36-41, 43 and 45-61, in the reply filed on January 4, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 1-35, 42, 44 and 49 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Claim 49, though elected by Applicant, is withdrawn as it depends upon non-elected claim 10.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.
4. Claims 36-41, 43 and 45-61 rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. No technical subject matter is being claimed. As is, the invention may be performed by hand, via paper and pencil/pen.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 35-40, 43-45 and 61 are rejected under 35 U.S.C. 102(b) as being anticipated by Francisco, US 5,875,433. Note Fig. 6 of Francisco. The network 216 fully encompasses the term “agent” as recited in the claim language.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 38, 41, 46-48 and 50-60 are rejected under 35 U.S.C. 103(a) as being unpatentable over Francisco, US 5,875,433. Francisco does not disclose the term segmented, having a unique identifier, keeping the identity of the seller secret, and analyzing the data and filing a tax return.

Official Notice is taken that each of these features has been well known common knowledge within the consulting art. To have provided such for Francisco would have been obvious to one of ordinary skill in the art. The motivation for doing such is to maintain confidential information with the ability to analyze such for tax revenue enhancement purposes.

9. Further pertinent references of interest are noted on the attached PTO-892.

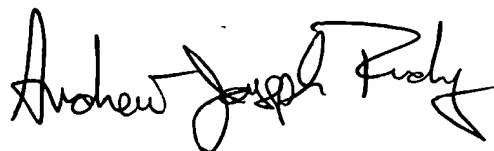

10. Applicant's Information Disclosure Statement (IDS) has been reviewed. However, the "AX" reference listed was not included with the submission of the IDS. Thus, the "AX" was not reviewed. Note the attached PTO-1449.
